

Sixth Grade Vocabulary Math Words

Chapter 1- All About Whole Numbers and Decimals

standard form	expanded form
short word form	variable
equation	variable

Chapter 2- Multiplying and Dividing Whole Numbers and Decimals

associative property	commutative property
property of zero	distributive property
identity property	order of operations
variables	quotient

Chapter 3- Using Data and Statistics

range	mean
median	mode
bar graph	line graph
double line graph	stem and leaf plot
frequency table	histogram

Chapter 4- Number Theory and Fractions

divisible	exponent	power
composite number	simplest form	improper fraction
greatest common factor (GCF)		equivalent fractions
least common factor (LCF)		base
least common denominator		prime number
prime factorization		mixed number
multiples		variables

Chapter 5- Adding and Subtracting Fractions

least common denominator (LCD)
denominator
equivalent fraction
greatest common factor (GCF)

numerator
simplify
simplest form
